

# Stainless Steel VESA Arm Mount

ADD-SSVESAA

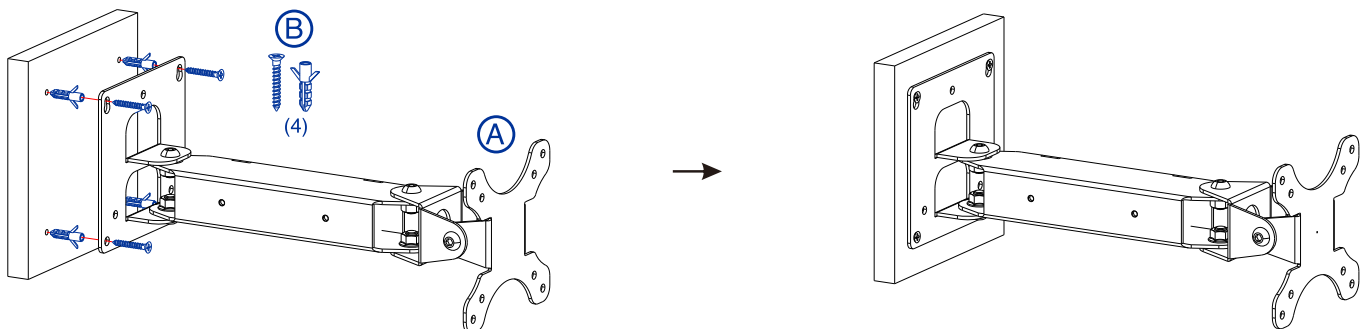

## INSTRUCTION - MANUAL

### CONTENTS:

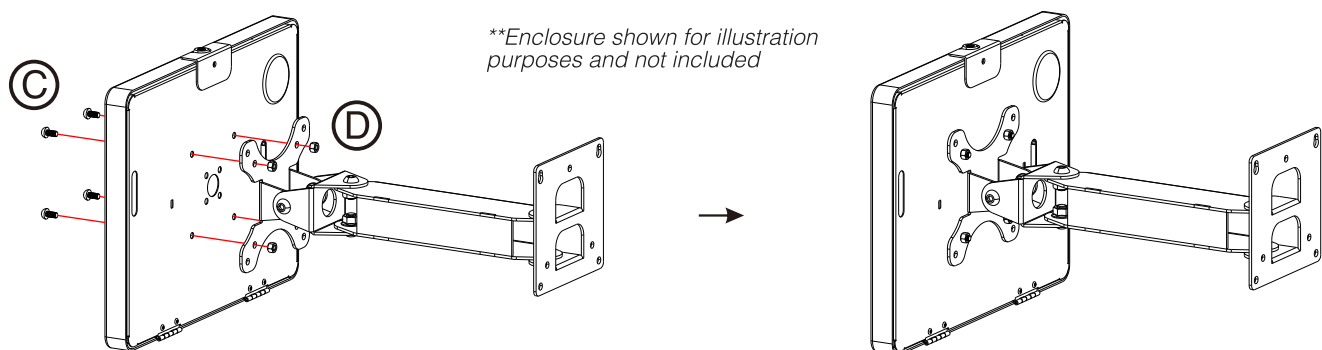

### INSTALLATION:

#### 1- When mounting to surface:

1A. Align VESA plate mounting holes to surface and mark off the holes with a pencil (not included). Predrill holes with a powerdrill (not included) matching the length and diameter of the screws. Insert four anchors (B) into the holes. Realign VESA plate mount holes of VESA mount with the now drilled wall holes. Rotate in the screws (B) using a screwdriver (not included) until securely tightened.

#### 2- When setting up enclosure:

*\*\*Enclosure shown for illustration purposes and not included*

2A. Align VESA mounting holes of enclosure of VESA compatible device with the VESA holes of mounting plate of the VESA mount. Rotate in screws from the front (C) while holding hex nuts (D) from behind the VESA mounting plate as shown above using screwdriver tool (not included). Rotate until securely tightened.
