Impact case to protect your iPad

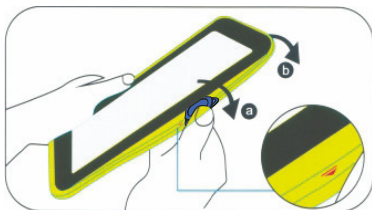

**Tablet Not Included

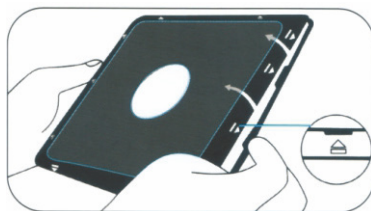

INSTRUCTIONS

**if your iPad has a previously installed screen protector, please remove it before continuing.

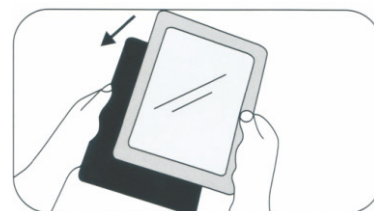

1. How to insert tablet into case

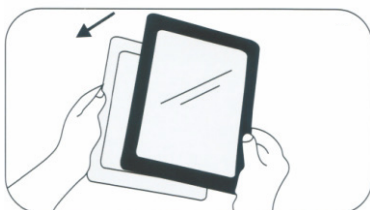

1A. Remove the external silicone sleeve with either your hands or provided clip tool. Then work your way around peeling clockwise the silicone case off

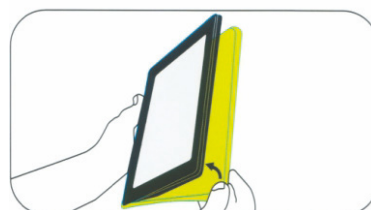

1B. Locate clips all around the perimeter of the inner hard case. Apply pressure to each clip and unclip all around. Once everything is unclipped, the front cover will come off

1C. Insert tablet into rear cover as illustrated

1D. Once tablet is inserted into the rear cover, place the front cover over and clip in on all sides

1E. Re-apply the silicone jacket. With your hands, start with a corner, then work clockwise pressing the jacket back on

2. How to use in handheld

**Tablet Not Included

2A. Identify velcro handstrap and adjust to fitted size. Insert your hand as shown and you're ready for mobile setup.

3. Attaching carry strap

**Strap Not Included

3A. If you have the corresponding shoulder strap (sold separately), insert the ends into the strap holes. Then tie them up and clasp the front as shown to the left.
