D

M3 Anti-theft Key (1)

F

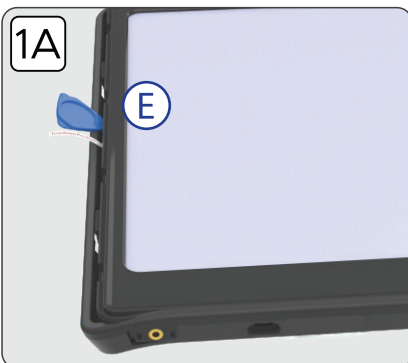

M1 Allen Key (1)

INSTRUCTIONS:

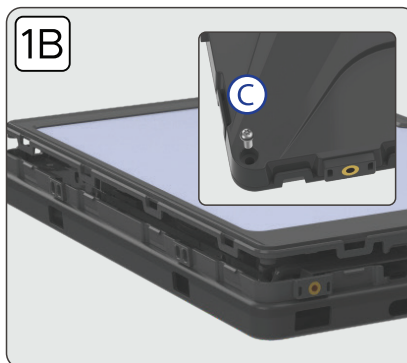

1. Setting Up Device into Case

1A

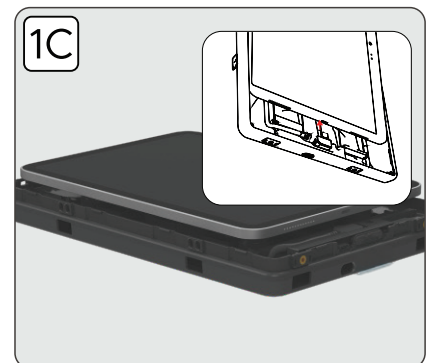

1A. Peel the outer silicone sleeve from the internal hard case using component (E). Do not take off completely. Peel back enough so you can see the edges of the hard interior case (A).

1B

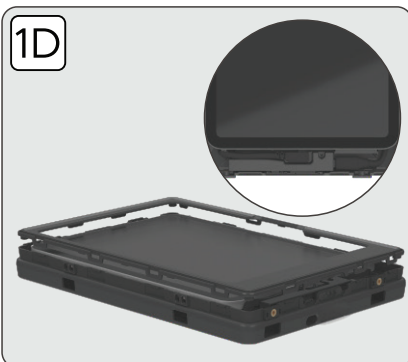

1B. To open case, first make sure the four specialty screws (C) are removed from the back of the hard case using provided tool (D). Then use your fingers or pick (E), to unclip around all edges. The internal hard case will open when all 4 sides are unclipped. Remove the top cover.

1C

1C. Insert your tablet into the hard case. Begin by plugging in the right angle USB cable before inserting it into the case. After the cable is attached, insert your tablet into the case until everything is aligned and fitted in securely.

1D

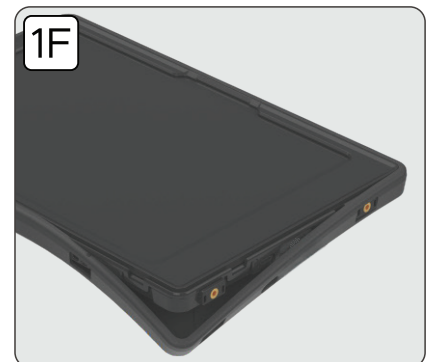

1D. Once the tablet device is inside, plug the internal charging cable into the power port of the device. Then re-clip back on the front hard cover on top of the hard case. Make sure to go around the perimeter and clip it all in.

1E

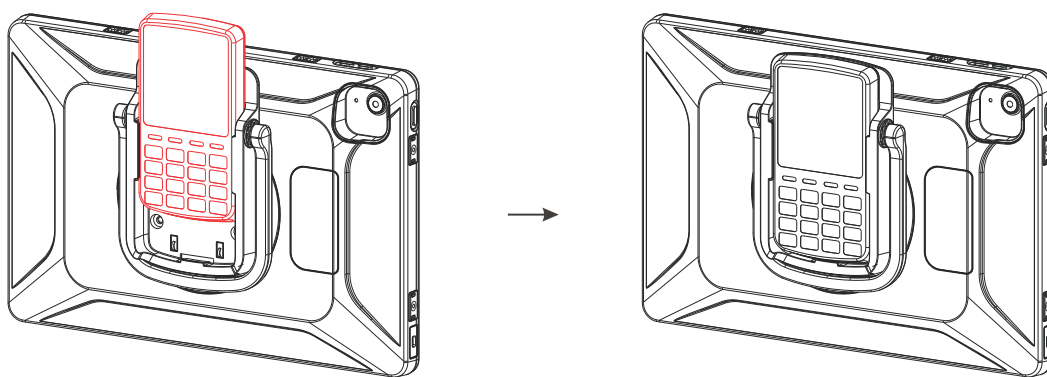

1E. Tighten 4 security screws (C) with the included specialty allen key tool (D). Rotate until securely tightened for all four locations.

1F

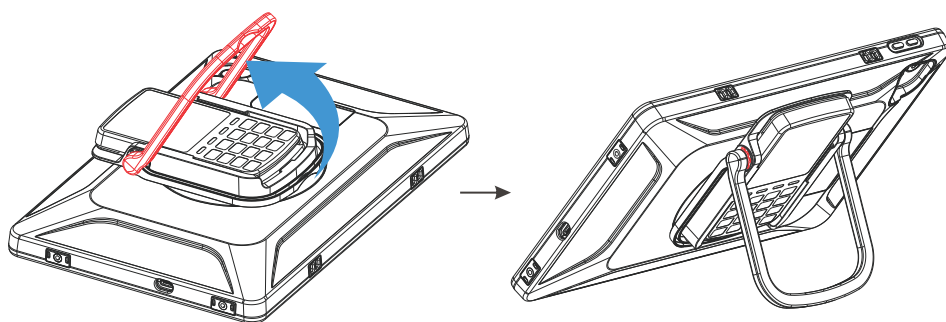

1F. Reinstall the external silicone rubber sleeve jacket. Start with one corner and work your way around. Using your hands, stretch the silicone jacket back over the edges to fit properly.

3. Inserting Link 2500 into Card Reader Holder

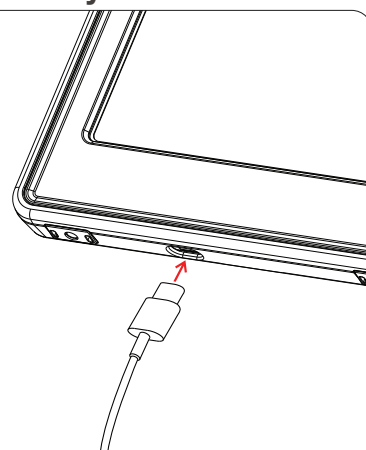

3A. Slide Link 2500 device into holder until is secured in place.

4. How to flip out kickstand

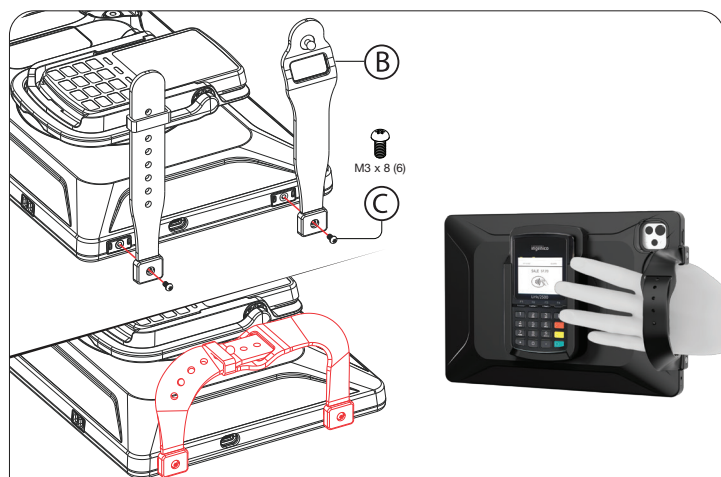

4A. Flip kickstand up at the bottom groove. Adjust kickstand to display tablet at desired viewing angle. Flip it back down to get back to handheld mode.

5. Connect case directly to USB-C

5A. Connect the USB-C cable to the USB-C port on the case then plug the power supply into a power outlet.

6. Attaching Hand Strap Add-Ons via Anchor Points on Case

6A. Determine which side of the case you would like to attach the add-on strap (B). Align the mounting holes as illustrated above. Rotate in the screws (C) that come with the add-on on the side using screwdriver tool (not included). Rotate until securely tightened.

7. Attaching Shoulder Strap via Embedded Hook Anchor Points on Case (Not Included)

***Shoulder strap not included*

7A. Locate embedded hooks on edges of case. Determine if you want to attach the shoulder strap on a long side or short side of the case. Attach shoulder strap (not included) by threading it through the hooks and create a knot. Repeat for other end as well.
