

# Dual Security Compact Kiosk

for iPad, iPad Air, and iPad Pro 9.7

## Dual Security Compact Kiosk

This all-inclusive kiosk stand for iPad, iPad Air, and iPad Pro 9.7 melds style, functionality, and security in one compact package. The minimalist, modern enclosure is engineered to allow full access to all of your iPad's ports, buttons, and jacks, while securing the device inside with a powerful key lock in the rear. The interior is outfitted with scratch-protective padding to minimize risk of damage to your tablet while in use, plus cable management loops for a clean look while charging. The stand base rotates a full 360 degrees to allow for quick switches between sides during a transaction, making the kiosk an excellent fit for retail points of sale, reception desks, classrooms, and more. Also included is an optional steel security cable, which affixes to a K-slot on the stand and attaches at the other end to any permanent fixture. This compact kiosk stand even includes a stylus and elastic tether, plus a built-in holder beneath the enclosure faceplate. This stand mounts easily to a desk, table, countertop, or other flat surface using either the included mounting hardware or strong double-sided adhesive pad.
