# Heavy-Duty Articulating Tablet Arm Mount

## Articulating Tablet Arm Mount

This versatile arm mount combines a generous set of joints and pivot points with rugged durability to make your tablet the centerpiece of your digital workspace. The perfect addition to a classroom, conference room, or doctor's office, this remarkable aluminum arm installs easily to a desk, countertop, or table, using either the adjustable scratch-protected C-clamp or the included grommet mounting system. At the mount's center is a sturdy pole, onto which the arm attaches at whatever height you need. From there, customize your setup further, with 360-degree rotating pivot points at both the arm base and at the flexible elbow joint. The tablet holder attaches to the end of the arm at another tilting joint and rotates 360 degrees for portrait and landscape orientations. Also included is a cable management grip ring, which slides over the central pole for a clean look while your tablet is charging.

### Features:

- Lightweight but durable aluminum construction
- Gas spring angle-adjustable arm with flexible elbow joint
- Two 360-degree pivot points on arm
- Tilting, angle-adjustable tablet holder rotates 360 degrees for portrait and landscape orientations
- Arm slides along pole for custom height-adjustment
