

PAD-DSGK

Dual Security Gooseneck Kiosk Stand with Locking Case and Anti-Theft Cable

for iPad Pro 9.7, iPad Gen. 5 (2017), iPad Gen. 6 (2018), and iPad Air

Dual Security Gooseneck Kiosk Stand

This unique stand makes your tablet the cornerstone of a sophisticated, streamlined point of sale. The stand combines the security of two independent locking mechanisms with a heavy-duty and flexible gooseneck. The locking aluminum case encloses your tablet but leaves total access to the charging port, volume buttons, home button, camera, and headphone jack, for credit card reader compatibility. The case can rotate a full 360 degrees for landscape and portrait orientations and fastens shut with a secure lock and key. For an optional added measure of theft protection, a locking steel cable attaches to either the stand base or holder. The malleable gooseneck can be adjusted to accommodate any viewing angle, greatly simplifying register transactions. The stand features a multi-faceted cable management system, employing slack management space inside the enclosure plus a rubberized cutout at the rear and hollow threading through the gooseneck. The large base and solid stand can be installed onto a desk or countertop either through predrilled holes and included mounting hardware, or using the included set of double-sided adhesive silicone pads. Also included are a stylus and built-in holder on the stand base.

Features include:

- Aluminum case allows access to charging port, home and volume buttons, headphone jack, and front and rear cameras
- Case rotates 360 degrees for easy landscape and portrait orientations
- Case lock keeps tablet secured inside kiosk stand
- Optional anti-theft cable secures stand to any permanent fixture
- Heavy-duty, flexible gooseneck adjusts to create any viewing angle
- Stand base installs onto desk or countertop with included mounting hardware or silicone pads
- Stylus with built-in holder on stand base
- Cable routing in stand neck and enclosure interior
- Compatible with iPad Gen. 5 (2017), iPad Gen. 6 (2018), iPad Air (1 and 2), and iPad Pro 9.7
