

10FT Cable with Kensington Lock & Master Key

ADD-CALOCK3M

10FT Cable with Kensington Lock & Master Key

This galvanized steel security cable is a proven theft deterrent. It's an excellent way to protect your laptop or tablet when using in a public space or need to step away at the library. To use, thread the loop end around a table leg, park bench or any anchored structure. Insert the locking mechanism into the K-slot of your tablet, device case, or laptop, and secure with the key (included). The 10-foot cut-resistant cable provides plenty of room to work wherever you need the added security.

Features:

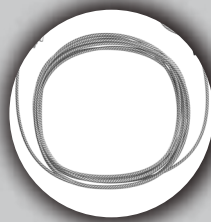

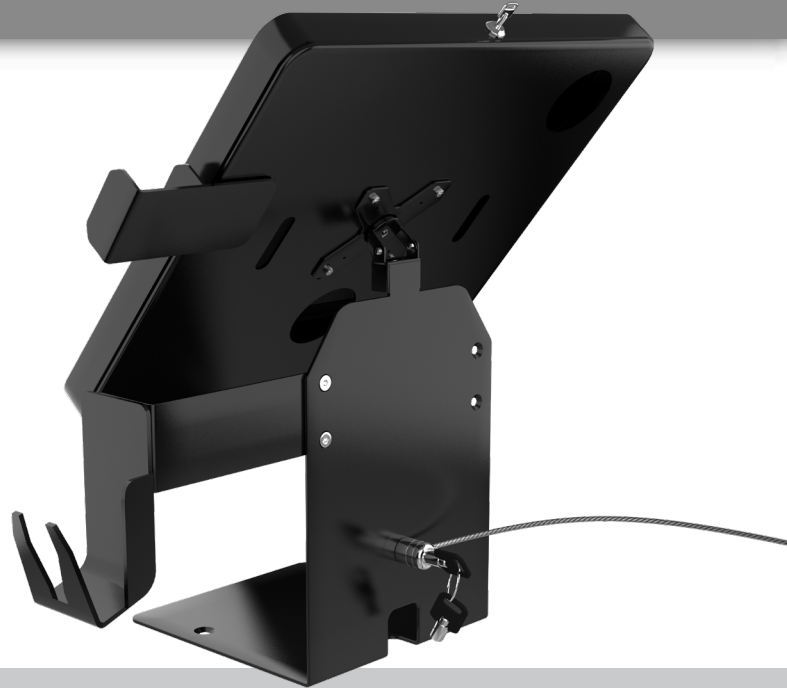

- 10-foot durable, cut-resistant steel cable
- Kensington slots are standard security features for most laptops, tablets, and device cases.
- Quality lock and key system

Specifications:

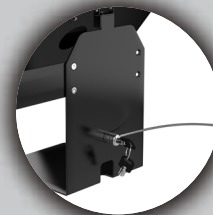

- Dimensions: 10-foot steel cable

Package contents:

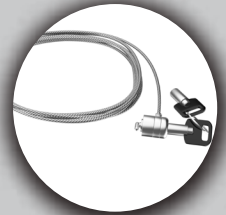

- (1) 10' steel anti-theft cable with loop and lock
- (1) Set of keys
