- (1) Add-on tray with gooseneck and VESA plate
- (1) Rugged rubber case with magnetic housing plate
- (1) Inductive charging back plate
- (1) Base
- (1) Set hardware

When you're in need of a sturdy workstation with the option to remove your tablet for handheld use, this is the kiosk stand for you. It's ideal for trade shows, sales meetings, office spaces, retail locations, welcome centers, and any place that requires brand messaging. Insert your graphic with ease into side slots. (We'll provide specs to help you create the right size graphic.) You'll find ample space behind the graphics panel to route charging cables. The padded steel base provides a scratch-resistant and secure foundation for your stand – as well as CTA Digital's Inductive Charging Case (included). The case is drop-resistant, splash-proof, and is securely held to the floor stand via a universal VESA mount. To use, simply plug the case into your iPad's charging port. Then, align the case to the base. Electromagnetic fields charge your iPad. When ready to convert to handheld unit, simply pop the case off the base, slip your hand into the padded strap on the back, and you're ready to move. Return the iPad to the workstation to continue charging.

Wireless Inductive Charging Technology

Customizable Graphic Slot

Ultra Flexible Gooseneck for Preferred Angles
