# VESA Compatible Desk or Wall Mount with Full Rotation (White)

## VESA Compatible Desk or Wall Mount

*\*\*Tablet Enclosure For Illustration and not Included*

This versatile desk mount is the perfect tablet stand for retail transactions, use at home, the office, hospitality counters, or any place you need the ability to fully tilt your tablet to face the opposite direction. The sturdy metal base can be permanently mounted to any horizontal surface via pre-drilled holes, but is also heavy enough for use even without screwing it down. The VESA plate rotates along the center cross-bar, allowing for use in either portrait or landscape orientation. The 75 x 75-millimeter and 100 x 100-millimeter VESA mount can be used in one of two ways. As a desk mount, it's simple to add a compatible enclosure, like CTA's popular PAD-PARAW Paragon Enclosures (not included), monitors, or other compatible device cases. The VESA mount can also be screwed into a wall, creating a versatile mount with plenty of angle adjustments. A pre-drilled hole through the center of the mount allows the added protection of a Kensington Cable, to loop and lock to a table leg, wall pipe or other permanent fixture (not included).

### Features:

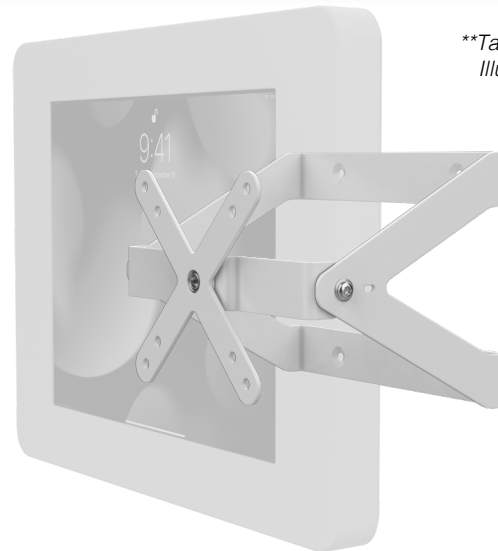

- Heavy-duty black metal A-frame base
- Portrait/Landscape orientation flexibility
- Allows a quick way to flip tablet for use by a second person
- Perfect for home, office, reception desks, waiting rooms, retail stores, and more
- 75 x 75-millimeter or 100 x 100-millimeter VESA mount
