Aluminum Security Vehicle Mount with VESA Plate

Aluminum Security Vehicle Mount with VESA Plate

This flexible, multi-jointed tablet mount keeps devices safe from theft and fully accessible in the front seat of your car. Designed for use with commercial and passenger vehicles alike, this drill-free car mount installs easily to your vehicle's seat rail using included mounting hardware and various connecting prongs for various sized seat rails. This intuitive design allows safe, fast removal at any time. The aluminum arm features tension-locking ball socket joints at the base and head, plus an additional rotating knee joint, allowing for virtually infinite positioning options. Atop this mount, you'll find a VESA plate that connects with any compatible 75 x 75 or 100 x 100-millimeter mount. The plate rotates 360 degrees for portrait and landscape orientations, and comes with a powerful lock and key security mechanism to protect your tablet from theft.

Features:

- Mounts to your vehicle's seat rail with no drilling required
- Lock and key security protects tablet from theft
- Two ball socket joints and one rotating knee joint
- VESA plate tilts and rotates 360 degrees for portrait and landscape orientations
