

# Dual Acrylic Enclosure Desk Mount w/ Storage Compartment

PAD-2VDMWA

## INSTRUCTION - MANUAL

### CONTENTS:

### INSTALLATION:

#### 1. Mounting Setup

*Mounting to Direct Surface*

OR

*Mounting to Another Vesa Compatible Item*

1A. When mounting into a surface for a desk mount mode, use (4) screws and (4) anchors as illustrated (H) and rotate through desk mount (A). Using a screwdriver (not provided), rotate in until securely tightened as shown above.

1B. When mounting into CTA Digital's ADD-PARAFS2 stands, first open the back door to the storage area. Then use the provided allen key tool (J) and rotate in screws (I) on top of the washers (K) as shown until securely fastened. Shut door and lock with key. (N)

## 2. Setting Up Enclosures

2A. Align VESA holes of CTA's acrylic enclosure (B) with one set of the desk mount (A) VESA holes in landscape orientation. Using the included allen key tool (F), rotate in screws (C) while holding hex nut (D) on the back side until securely tightened. Repeat the process for the other set of VESA holes and other enclosure.

## 3. Setting up Cable Routing and Access to Back Storage Area

3A. Unlock back storage area using the keys (N). Fish through the holes your cable as shown into the back storage area. Either fish through the holes at the bottom if required or even connect to any small charging items, device or accessories as needed that can fit into the space.

## 4. Setting up Acrylic Tablet Enclosures

\*\*Tablets shown are for illustration purposes and not included

4A. While holding the back security star key (D) tight in place Turn the front security star key (D) counter clock-wise until all 4 screws (B) are unscrewed. Then take off front part of enclosure.

4B. Using one of the compatible listed tablets, insert into the L-shaped adapters for a secure and tight fit. Insert tablet in back part of enclosure (A) as shown. Watch out orientation of tablet.

4C. Take the detached enclosure top (B), align the corner holes with the bottom portion. Then use the provided security star key (G), turn in clock-wise the star screws until securely tightened while holding the security star key (G) on the other side with your other hand. Screw in until securely tightened.
